

KMP actively protects the environment – and independent certifications like **NORDIC ECOLABEL** confirm the positive results. Nordic Ecolabelled cartridges fulfil stringent health and environmental requirements. They have an especially low impact throughout their life cycle, are tested for pollutants according to LGA or comply with other specifications like Blue Angel. What is more: Re-manufacturing by KMP saves resources. Nordic Ecolabel is the visible proof of our commitment to protect our planet:

REDUCING WASTE, CO2 AND ENERGY CONSUMPTION

Instead of building new cartridges, we protect the environment by extending their service life. That means: Less waste and less CO2 generation while consuming less resources and energy. Certified methodology for analysing the CO2 savings compared to a new production.

GUARANTEEING A SAFE WORK ENVIRONMENT

State-owned bodies reviewed the processes and equipment at our production facility when handling loose toner powder. In defining and implementing operational procedures, we protect the health of our employees.

RESOURCE-SAVING PRODUCTION

Nordic Ecolabelled toner cartridges consist of at least 75% recycled components.

AUTHENTIC COMMUNICATION

If relevant product aspects change, we will inform Nordic Ecolabel so that they can re-conform the license's validity. Consumers can be sure that all certified KMP products always fulfill the requirements set by Nordic Ecolabel.

DRIVING THE CIRCULAR ECONOMY

KMP's own recycling center "Save Resources" collects and re-manufactures empty cartridges according to DIN. We thus give them a second life, re-using them instead of throwing precious resources away.

CLEAR LABELLING

The packaging and instructions of our products bear the Nordic Ecolabel along with our unique identifying license number.

APPROVED HIGH QUALITY

We thoroughly test our products: They all comply with the international quality standards DIN 33870-1 (for monochrome cartridges) and DIN 33870-2 (for colour cartridges).

CONSUMER INFORMATION

We provide our consumers with safety instructions and contact details on the packaging as well as information that our Nordic Ecolabelled cartridges are professionally re-manufactured OEM cartridges.

CERTIFIED ENVIRONMENTAL MANAGEMENT POLICY

Our production site in Central Europe is certified in accordance with the international environmental standards of ISO 14001. Short distance transportation from one EU country to another produces low CO2 emissions and allows our products to be called off quickly.

CUSTOMER SATISFACTION

Our customers value the high-quality materials we use and our products' impeccable functionality. Complaints for Nordic Ecolabelled cartridges amount to less than 1%.

EASY TO COMPARE

Independent institutes calculate the page yield of our cartridges according to ISO/IEC 19752 (monochrome) and ISO/IEC 19798 (colour). In doing so, we encourage consumers to compare our capacity with the OEMs', thus promoting transparency.

ALWAYS UP-TO-DATE

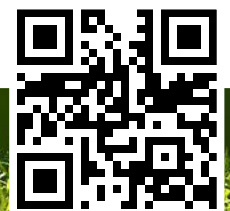

Nordic Ecolabel revises its certification criteria approximately every four years to better reflect the environmental developments. They regularly conduct on-site inspections to ensure all (re-)certified companies meet the defined criteria.

TRACEABLE PRODUCTS

We keep track of all our cartridges and their origins: Which company supplied us with which components, when they arrived at our premises as well as where and on which date we assembled the finished cartridges.

BY DECIDING FOR A KMP PRODUCT YOU WILL CONTRIBUTE TO THE PROTECTION OF PEOPLE AND THE ENVIRONMENT.

CERTIFIED CARTRIDGES.
